

My unique study habits involves taking music and art courses in my spare time

First it is a good way for me to take a break from studying.

As a student, I am very busy with my studies. Whenever I fell exhausted after a day's study and tired of learning my major courses, taking music and art courses is a good way for me to release my stress.

Second a lot of friend can be made by taking music and art courses.

I can meet different people with different ideas. Last week, I communicate with my new friend in the music class.

We discussed our different opinions and discovered we shared some of the same interests. We had a lot of fun.

That is my unique study habits.

I prefer go shopping in a large store for the following reasons

First it is very convenient . You know , as a student, I'm very busy with my studies. Shopping in a large store helps me save time.

Cuz a large store has a large selection, giving me the opportunity to buy all of my goods at the same time. And I can use the time I save to study more.

Second , Since a large store's products are cheaper, shopping in a large store save me money.

You know, for me, I don't have much money , all my money comes from my parents,.

So I would rather use the money I saved by shopping at a large store to buy more useful books to enrich my knowledge and improve my academic performance on my final exam.

If one of my friends is going to give presentation, I would give him two suggestions.

First, practice make perfect. He should familiarize himself with materials he is going to talk about and focus on the reasons for giving the presentation.

Like once, when I have to give a talk in front of a large group students. At the beginning, I was nervous, but then I realized that it was just practice, and practice is a good way to build confidence. Remembering that, I relaxed, and you know what, my talk was a success.

Second, I would tell my friend to take a training course. In a training course, he can get help from professional teachers.

His problems can be resolved then and there. With those teachers' help, it would be easy to give a successful presentation.

Those are my two suggestions.

I prefer to spend time with my family and friends for two reasons.

First, it is a good way to relax—talking with my family and friend usually helps me relieve stress, which in turn leaves me energized for the next day

Second, my family and friends have always been a source of help with my studies. For instance, I am not good at history. So whenever I struggle to understand how an important historical events affects the present, my family and friends lend a hand.

For these 2 reasons, I prefer to spend time with my family and friends.

I am a big fan of travelling. Since I believe that travelling can push me to broaden my horizon and see the world in a different way

The problem of always staying in the same place is that my world is getting smaller.

So as long as I get enough money, I would go to a different place to travel and I can always experience something that I'll never experience in my hometown.

And I can always be a better person afterwards.

Personally, I think a good work ethic is the most important quality to a university student.

The case might apply to highly motivated students. Motivation does not necessarily result in follow through.

The greatest predictor of being a successful university student is how many hours are devoted to a goal. I believe the more student practice a skill, the better they will become at what they are trying to accomplish.

It is always hard work supporting their natural talents that guarantee life-long success.

For example, I live in Beijing, the capital city of china.

Every year, when it come to winter, Beijing will suffer from very serious air pollution.

The poor air quality outside has not only brought us inconvenience of not being able to outdoor exercise, but it has also become one of the reasons that will contribute to some of the serious illness such as lung cancer and heart disease.

So we should not

I want to plant trees in a park for the following reasons

First, planting trees protects the environment, Since tree can absorb carbon dioxide, conserve water, and prevent soil erosion.

Second, I just want to give people more opportunity to relax. You know, being surrounded by trees is always beneficial to one's mental health. And wandering in the park abundant with tree can provide one with the perfect opportunity to reflect on his struggles and successes.

After all, fantastic scenery always has a way of relieving people's stress and making their lives more manageable.

Computers have changed our life tremendously in so many ways

First of all, computers have made it easier for us to search for the information.

For example, whenever I have some questions and wanna find out the answer, The only thing I need to do is to put the key words of my question into the search engine like goole, and the information I need will appear on the screen within seconds, which is really convenient as well

as time-saving.

The internet makes my daily life convenient for the following reasons.

First, I believe the internet is the easiest and cheapest source of entertainment. With a computer in front of me , I can play games, listen to music , and watch the latest shows on demand. With the help of internet, I am always satisfied.

Second, the internet simplifies communication. For example, it used to take my mom days to receive a letter from my dad, who used to work in a faraway place. But unlike, that generation, the only thing I need to do whenever I miss my friends is to give them a face-time call on my phone, and I can not only hear their voices, but also see their smiling faces within seconds, which is really convenient as well as time-saving.
